21 December 2015

Dear Prof **Kostić**,

We are writing to you in response to your proposal to become an Ambassador of the European Brain Council.

As a sign of our high appreciation for your valuable contribution to the study of the brain, we would like to offer you to assume the role of an EBC Ambassador for the years to come.

For 2016 and beyond, we plan to run a range of complex and ambitious projects focused around some of the most pressing priorities for our constituency such as the development of a European and national brain strategies, an EU-wide study on the Value of Treatment, as well as a European Population Neuroscience Strategy.

We have the outmost belief that your extensive experience in the field of brain disorders would allow you to play a pivotal role in supporting EBC to successfully complete such initiatives as listed above.

Should you do us the honour of agreeing in principle to expand your collaboration with us, we would be glad to hold a consultation that would determine your concrete level of involvement in this endeavour.

We are looking forward to your feedback with great interest.

Sincerely yours,

David Nutt  
President of EBC
