

Survey on the current state of care for patients suffering from brain diseases

UPDATED: 27/06/2018

NUMBER OF RESPONSES: 17

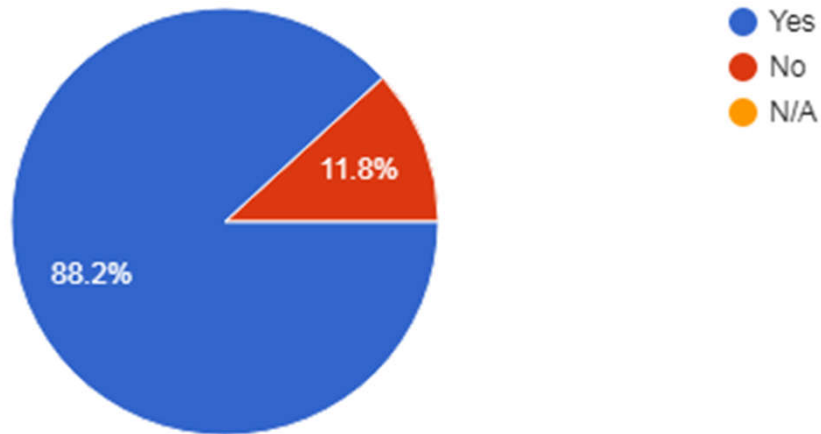

Countries that responded to the survey

Q1-Do you agree with the current state of prevention being

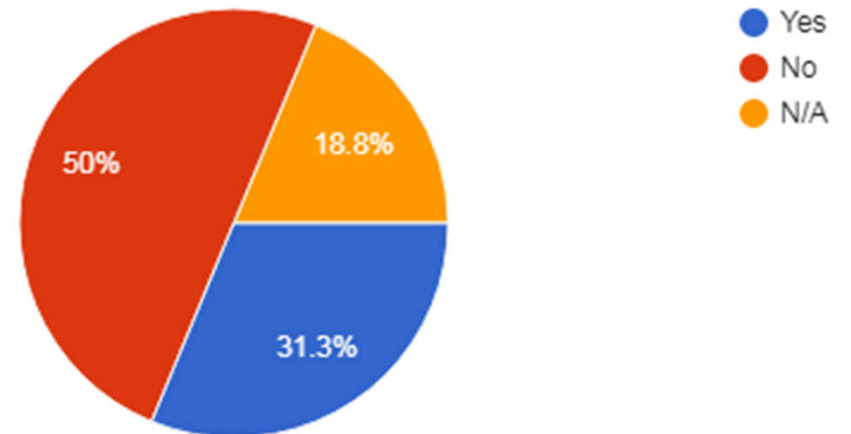

Q1-A-Not homogeneous within regions

17 responses

Q1-B-Of good quality of care except for psychiatry

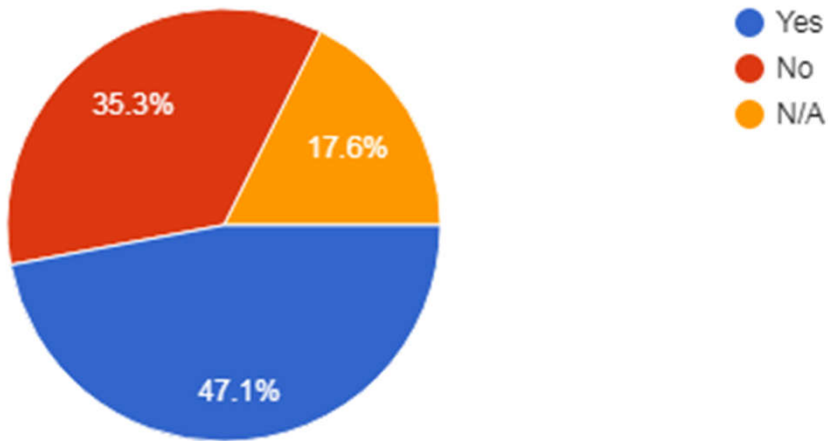

16 responses

Q2-Do you agree with the current state of diagnosis

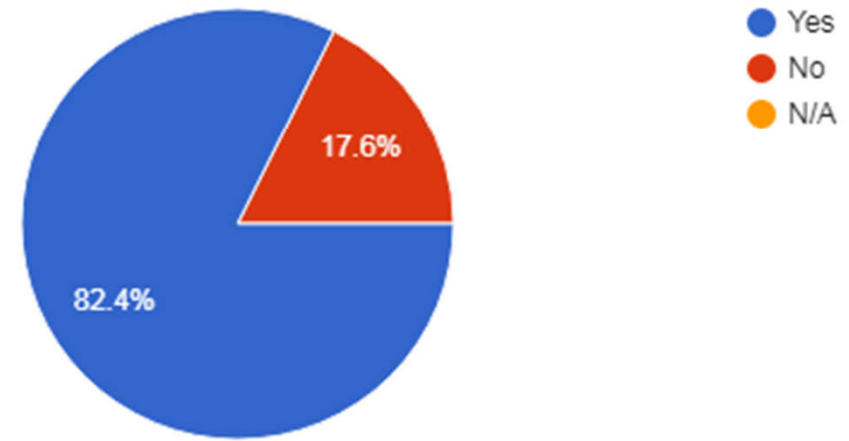

Q2-A-In general delay in accurate diagnosis

17 responses

Q2-B-Delay in diagnosis for neurocognitive and sleep disorders

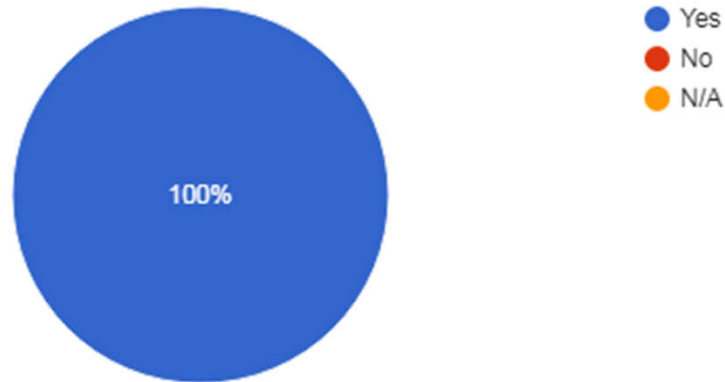

17 responses

Q3-Do you agree with the current state of treatment

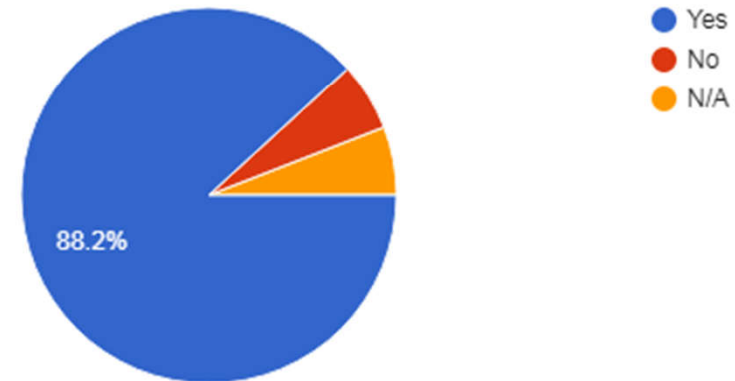

Q3-A-Deficiency in multidisciplinary integrated home care

17 responses

Q3-B-Weaknesses in rehabilitation programme and non-pharmacological therapeutics

17 responses

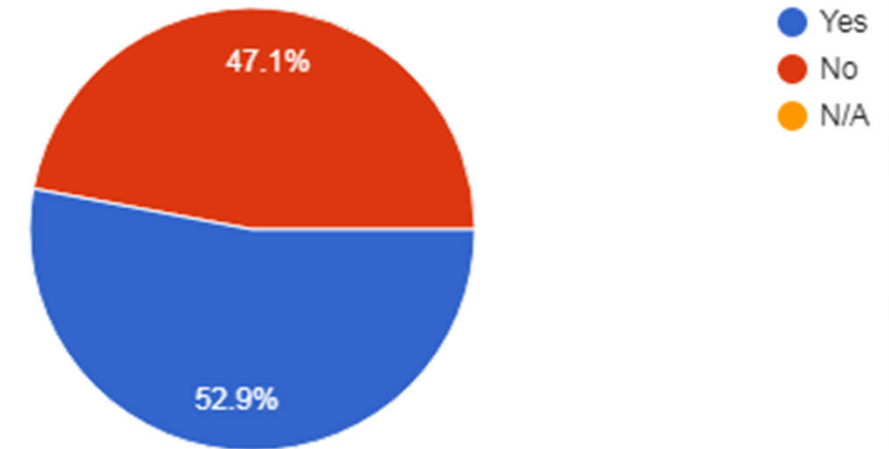

Q4-Do you agree with the order of priorities presently allocated

- ▶ Stroke
- ▶ Alzheimer disease
- ▶ Multiple sclerosis
- ▶ Parkinson
- ▶ Psychiatric diseases are NOT sufficiently supported

Q4

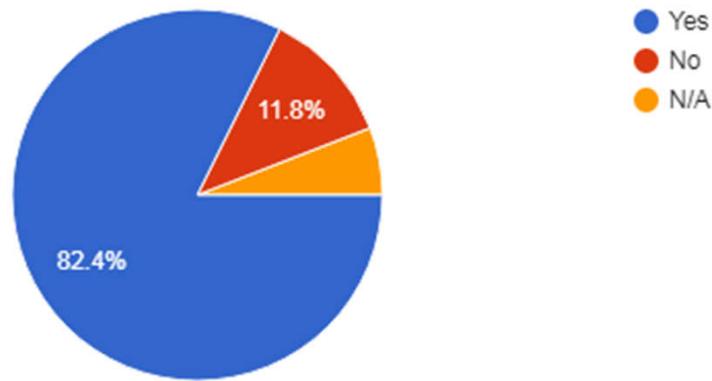

17 responses

Q5-Do you agree with the existence of the following current trends for improvement of patients care

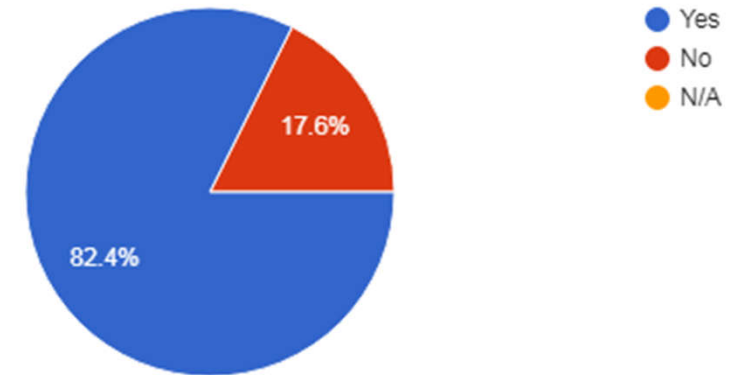

Q5-A-National policy to reduce hospitalisation by improving healthcare pathways and ambulatory management

17 responses

Q5-B-National center for better diagnosis of rare neuro diseases

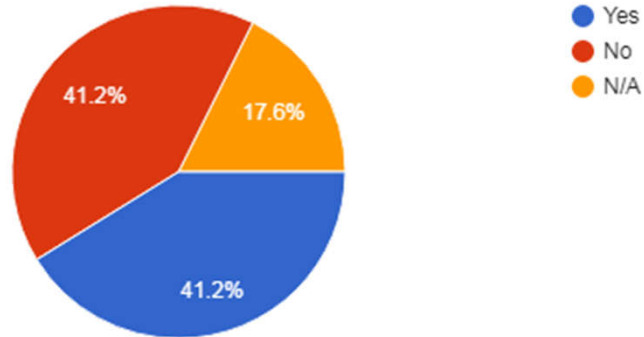

17 responses

Q6-Do you agree with the following increases in your government spending for patients with brain disease

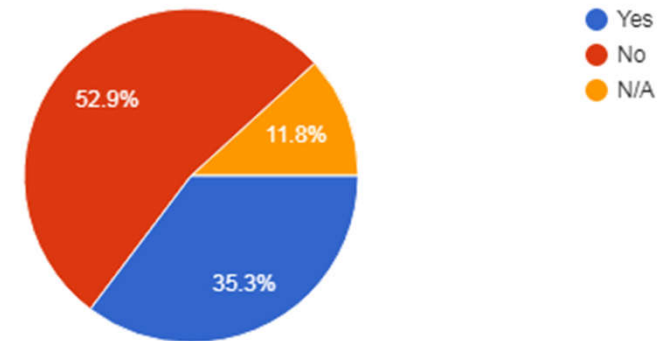

Q6-A-Initiatives with budget for Huntington diseases in particular home care

17 responses

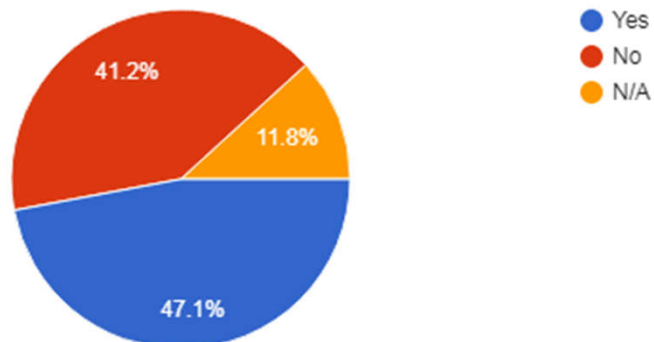

Q6-B-Initiatives with budget for Multiple sclerosis in particular in home care

17 responses

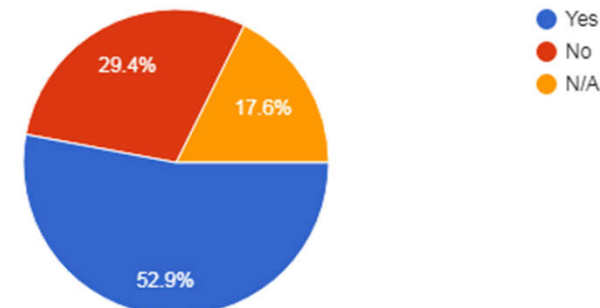

Q6-C-Initiatives for ALS in particular in home care

17 responses

Q6-D-Existence of National Plan for Alzheimer and Related disorders (ADRD in France)

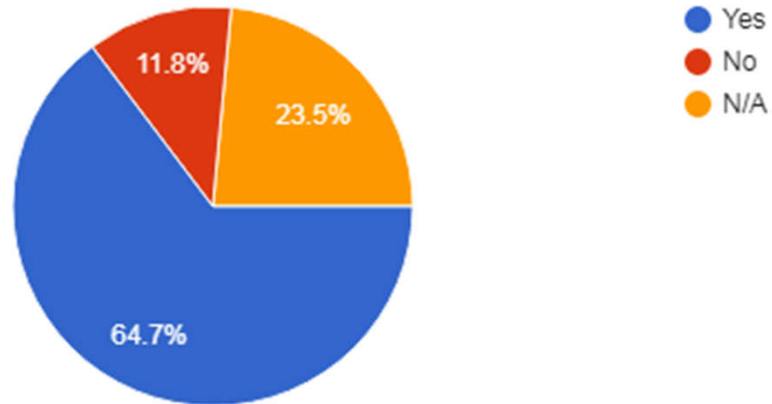

17 responses

Q6-Do you agree with the following increases in your government spending for patients with brain disease

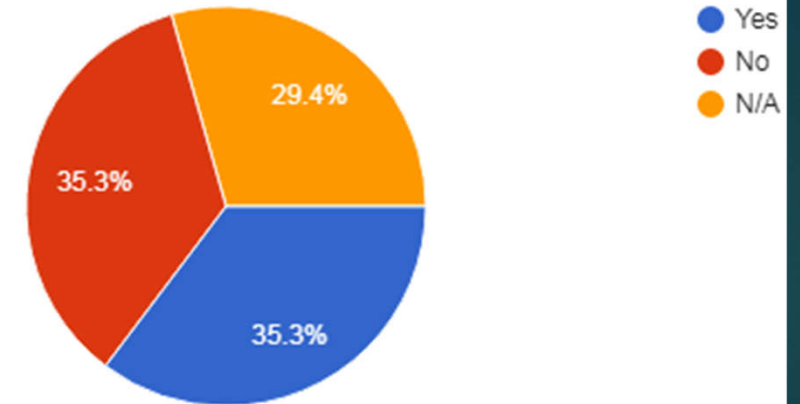

Q6-E-Existence of plans for rare diseases

17 responses

Q6-F-Initiatives with budget for Autism

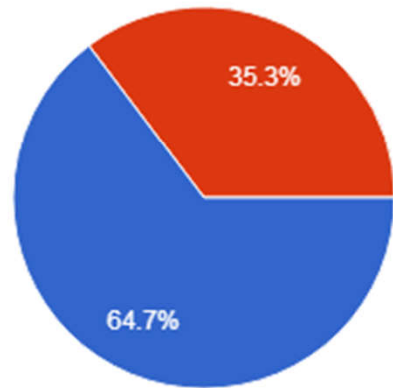

17 responses

Q7-About the efforts made to increase collaboration amongst medical (General practitioner, neurologists and psychiatrists) and paramedical staff (GPs, nurses, other trained assistants) for the care of patients

Q7-A-Do they exist

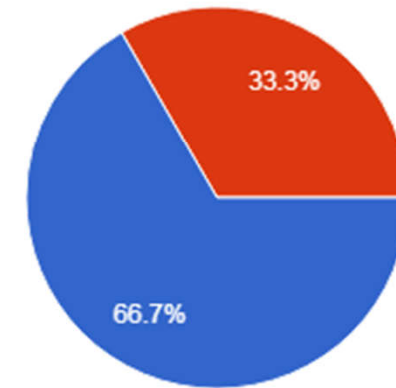

17 responses

● Yes
● No
● N/A

Q7-B-Are they efficient

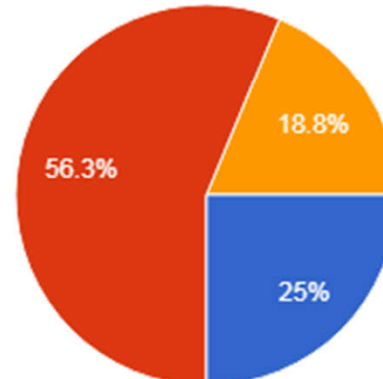

3 responses

● Yes
● No
● N/A

Q7-C-Exist only amongst patients associations

16 responses

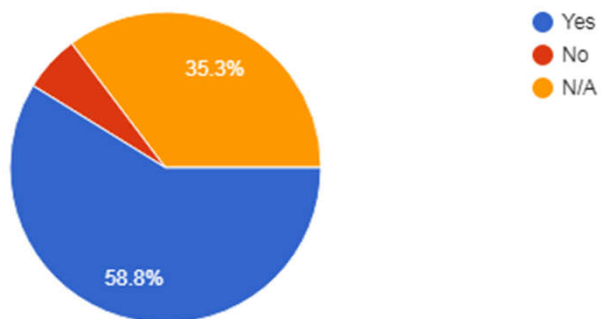

● Yes
● No
● N/A

Q8-Access to new and innovative technologies (Neuroimaging, pet scan, clinical neurophysiology platforms)

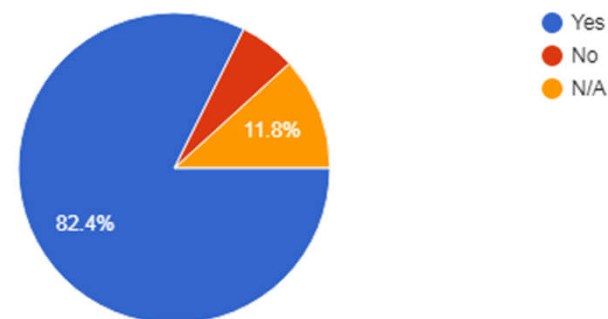

Q8-A-Have this access improved

17 responses

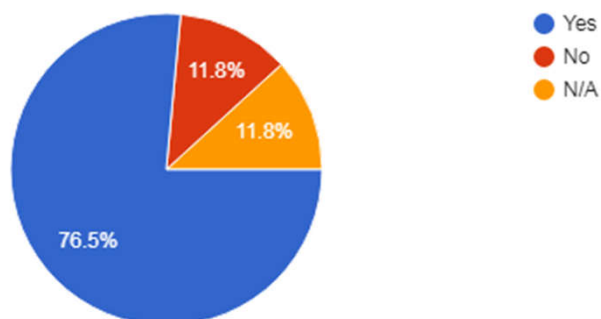

Q8-B-For Multiple sclerosis

17 responses

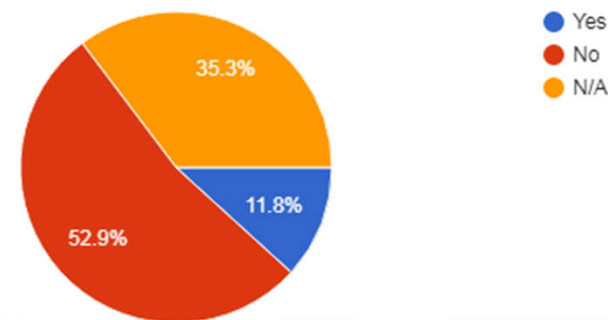

Q8-C-For Stroke

17 responses

Q8-D-Shortening approval process for drugs to be on the market

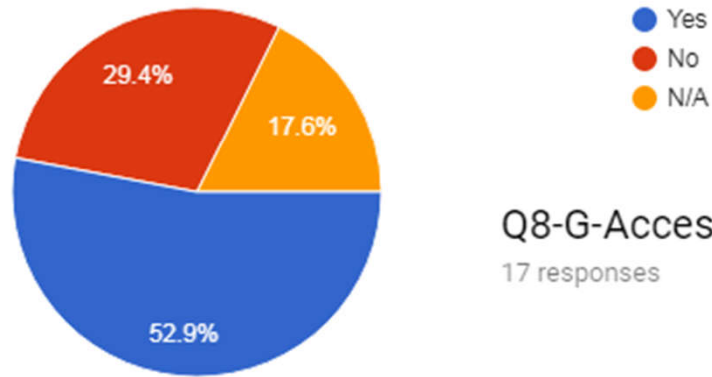

17 responses

Q8-Access to new and innovative technologies (Neuroimaging, pet scan, clinical neurophysiology platforms)

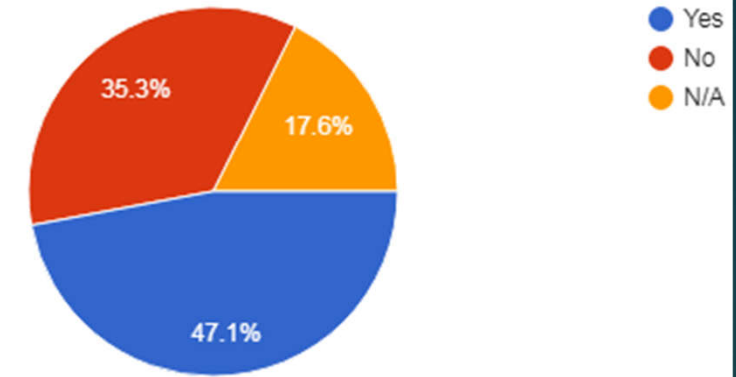

Q8-E-Reimbursement for accessing new technologies

17 responses

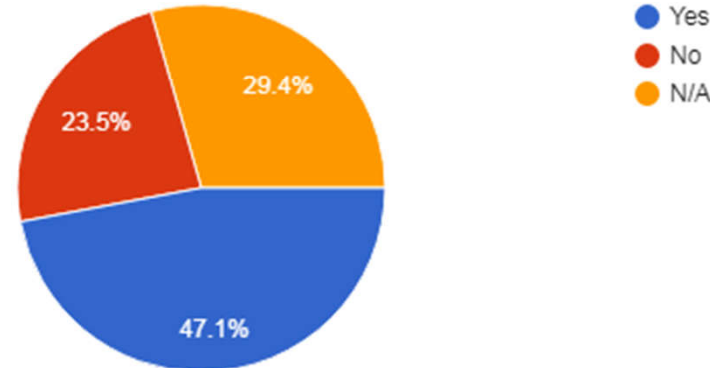

Q8-F-Access to new disease modifying drugs

17 responses

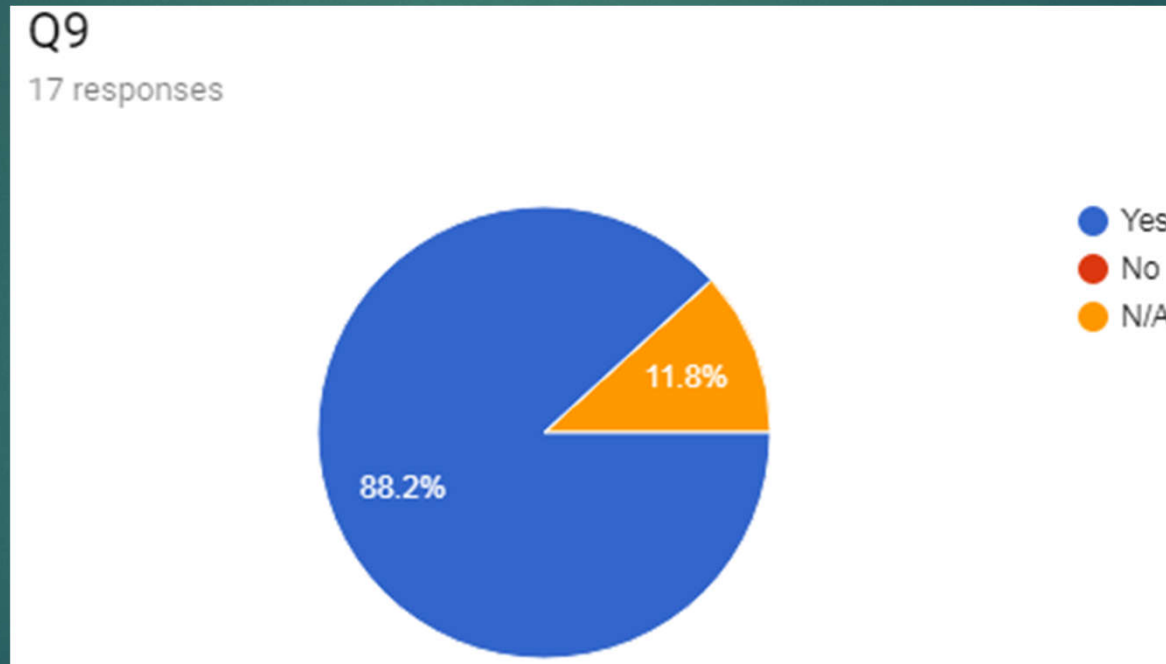

Q8-G-Access to non pharmacological approaches

17 responses

Q9-The implementation for better coordination in the care of brain diseases is still left behind

Q10-Do you agree with the following challenges to be performed/tackled for improving care for patients with brain diseases

Q10-A-Develop evidence based and socially responsible policy by collecting data from ongoing clinical trials and ...earch to optimally address unmet needs

17 responses

● Yes
● No
● N/A

Q10-C-Increase education on innovative technologies

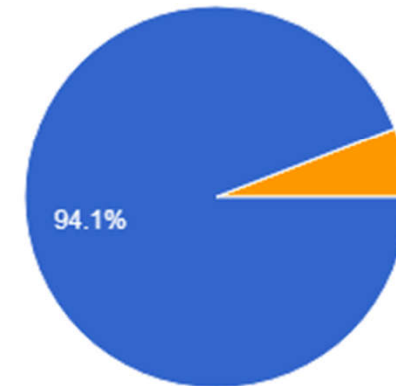

17 responses

● Yes
● No
● N/A

Q10-B-Develop translational research

17 responses

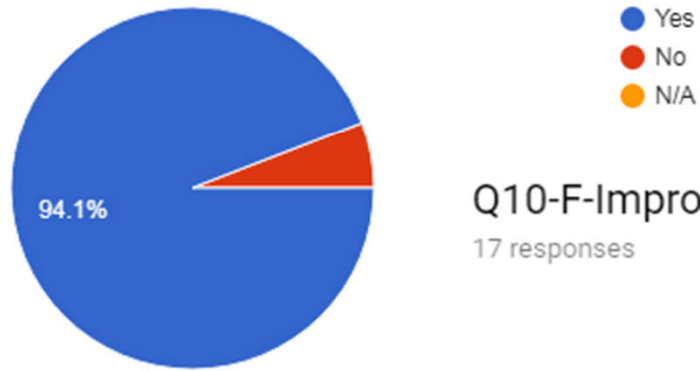

● Yes
● No
● N/A

Q10-Do you agree with the following challenges to be performed/tackled for improving care for patients with brain diseases

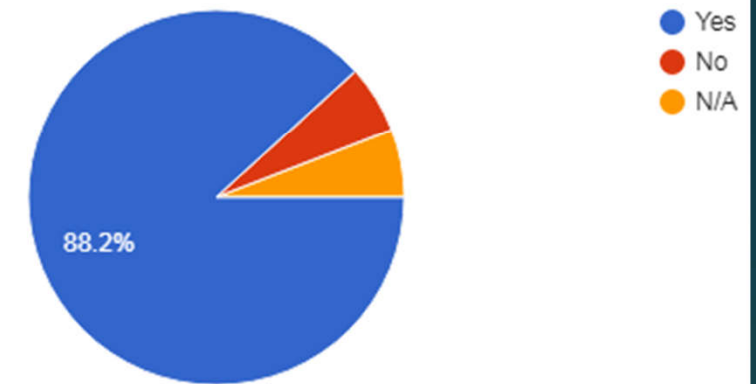

Q10-D-Improve structure of coordinated healthcare

17 responses

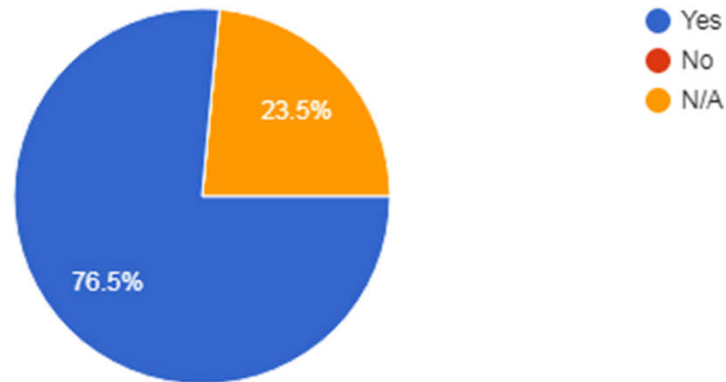

Q10-E-Improve rehabilitation programmes

17 responses

Q10-F-Improve budget and research in psychiatry

17 responses
